MOUNTING (WHEN HUNG FROM CEILING)

Put the 4 ends of the leather string through the 4 largest hole in the brass candleholder and tie 4 knots on the inside of the circle. Hang the top noose of the leather string on a hook (or similar) in the ceiling.

Before hanging the Candle Holder Circle, please make sure to test the knots are tied correctly. Also make sure the hook in the ceiling is mounted correctly and can carry the weight. Note that different ceiling materials require different types of rawlplugs and screws. If you are uncertain of which type to use, ask in your local hardware store.

Attention: If you shorten the strings it might leave burn marks in the ceiling.

USE OF CANDLES

We recommend using only candles made of 100% stearin to minimize dripping. As dripping can never be avoided 100%, avoid placing the candleholder directly above/on surfaces very sensitive to stearin.

CAREFUL

Always make sure to keep an eye on lit candles and remember to change candles before they burn entirely down to the candleholder. Place your candleholder out of reach of children and away from things that might catch fire.

Ferm LIVING shall not be responsible for any damages caused by improper mounting or use.
